EDUCATION

University of Bristol

Doctor of Philosophy (PhD), Engineering Mathematics

Bristol, UK

Sept. 2014 – Feb. 2018

University of York

Bachelor of Science (BSc), Mathematics & Philosophy - First Class Honours

York, UK

Sept. 2010 – July 2013

EXPERIENCE

Head of AI | Simudyne, UK

February 2024 – Present

- Lead on all AI strategy, guiding investor and client discussions, inputting into financial models for the company, assisting with Series B funding raise.
- Built a team of engineers working on AI research and development.
- Research lead on three major products: reinforcement learning for investment strategy, multi-modal vision models for healthcare, neuro-symbolic simulations.

Quantitative Researcher | Simudyne, UK

March 2023 – February 2024

- Technical lead on developing AI features and products.
- Research on LLM-based interface for simulations, reinforcement learning for hedging strategies, and deep calibration for market simulation.
- Containerized a market simulator to be used in production by a major Asian exchange.

Data Science Group Principle Investigator | Alan Turing Institute, UK

January 2023 – August 2023

- Research project combining machine learning with policy-based inference and optimization.

Post-doctoral Research Associate | University College London, UK

April 2021 – April 2023

- Research position with Prof. Roberto Mayor on modelling of collective cell migration.
- Combination of biophysics, deep learning, and data analysis.
- Supervisor on MSc projects.

Post-doctoral Research Associate | University of Bristol, UK

March 2018 – April 2021

- Research position with Prof. Sabine Hauert on *in silico* drug design.
- Developed stochastic and agent-based models for optimising nanoparticle drug designs.
- Supervisor on MSc projects.

ADDITIONAL EXPERIENCE

Author | Manning Press

2022 – 2025

- Co-author on the technical book “GNNs in Action” for graph-based deep learning methods.

Co-organiser | The Alan Turing Institute, UK

2022 – 2024

- Co-organiser of the “Simulation for Science” interest group.

Visiting Scholar | University of Amsterdam, Netherlands

2022

- Working with Prof. Jakob Tomczak on deep generative models of cell migration.

Visiting Scholar | University of Liege, Belgium

2022

- Working with Prof. Gilles Louppe on Bayesian methods for models of cell migration.

AWARDS & FUNDING

Travelling Fellowship | £1,500 | *Personal research award from the Company of Biologists*

October 2022

ATI PDEA | £2,000 | *Personal research award from the Alan Turing Institute*

Feb. 2022 – Feb 2023

UKCRF | £5,000 | *Research funding from the UK Cancer Research Fund*

June 2020 – June 2021

WUN | £3,000 | *Research funding from World University Network*

June 2020 – June 2021

EPSRC Mathematics CASE Studentship | £60,000 | *Industrial Award with EDF, Sellafield*

June 2014 – 2018

TECHNICAL SKILLS

Tech: Python, C++, MatLab, PyTorch, PyTorch Geometric, Linux, JAX

Developer Tools: Git, Docker, AWS, Red Hat OCP, Azure, VS Code

RESEARCH PROJECTS

Generative Biophysics | *Bayesian inference, deep geometric learning, cell biology* April 2021 – April 2023

- Independent research project combining Bayesian inference with biophysics and deep learning.
- Developing deep generative models with geometric priors to infer cell-cell interaction networks.
- Collaborating with Prof. Silke Henkes on statistical physics of cell migration.
- Collaborating with Prof. Gilles Louppe on simulation-based inference and model comparison.

EVONANO | *Nanomedicine, in silico drug design, evolutionary optimisation* May 2018 – April 2021

- Horizon2020 research project on optimising nanoparticle designs for cancer treatment.
- Designed a computational platform combining multi-scale biology simulations with evolutionary optimisation.
- Research output was published and presented internationally as well as covered in media outlets.

SELECTED PEER-REVIEWED PUBLICATIONS

- Delan N Alasaadi et al. “Competence for neural crest induction is controlled by hydrostatic pressure through Yap”. In: *Nature Cell Biology* 26.4 (2024), pp. 530–541.
- Namid R Stillman and Rory Baggott. “Neuro-Symbolic Traders: Assessing the Wisdom of AI Crowds in Markets”. In: *arXiv preprint arXiv:2410.14587* (2024).
- Kang Gao et al. “Deeper Hedging: A New Agent-based Model for Effective Deep Hedging”. In: 2023, pp. 270–278.
- Namid Stillman et al. “Graph-informed simulation-based inference for models of active matter”. In: 2023.
- Namid R Stillman and Roberto Mayor. “Generative models of morphogenesis in developmental biology”. In: *Seminars in Cell & Developmental Biology* 147 (2023), pp. 83–90.
- Namid R Stillman et al. “Deep Calibration of Market Simulations using Neural Density Estimators and Embedding Networks”. In: 2023, pp. 46–54.
- Namid R Stillman et al. “Evolutionary computational platform for the automatic discovery of nanocarriers for cancer treatment”. In: *NPJ Computational Materials* 7.1 (2021), p. 150.

SELECTED PRESENTATIONS & WORKSHOPS

University of Amsterdam | *Amsterdam, Netherlands* 2022

Presentation: “Connecting the Dots: Deep Generative Models for Cell Migration”

University of Liege | *Liege, Belgium* 2022

Presentation: “Connecting the Dots: Deep Generative Models for Cell Migration”

Juniper Networks | *Virtual* 2022

Invited Speaker: “Introduction to Graph Neural Networks”

Advancing Cancer Nanomedicine to the Clinics: Hypes, Hopes and Hurdles | *Magdeburg, Germany* 2022

Invited Speaker: “AI Assisted Computational Screening of Nanomedicines”

From Cells to Society: Collective learning across scales | *Virtual* 2022

Presentation at NeurIPs workshop to present paper on “Designing Neural Network Collectives”

Micro-/Nano Swarm Robotics Workshop | *Virtual* 2021

Co-organiser of symposium at ICRA on micro- and nano-robotics.

Digital Innovations in Cancer Workshop | *Virtual* 2020

Co-organiser of symposium exploring new computational research in cancer treatment.

Autonomous Behaviour in Living and Robotic Matter | *Virtual* 2020

Presentation: “Computational Pipeline for Nanomedicine Drug Design”

REVIEWER

NeurIPS, ICLR, ICML, Nature & Nature partner journals, BioSystems, UltraMicroscopy
